Umicore – precious metals with ideals

We have been producing and selling precious metals for over 170 years; this makes Umicore one of the oldest suppliers of internationally accredited and certified gold and silver bars. Umicore gold bars are a safe investment, combining tradition with responsibility for the future.

Our precious metal bars are produced sustainably, using precious metals from our world's largest

- Safe
- Certified
- Sustainable

recycling plant for electronic waste, old mobile phones, laptops, and discarded catalytic converters. A total of 18 valuable metals are thus returned to the production cycle. In this way, we make a

significant contribution to conserving natural resources.

The gold and silver for our Umicore precious metal bars comes from LBMA-certified producers and are accepted around the globe. Precious metal bars from Umicore are sold in all standard sizes and shapes at banks, savings banks and selected trading partners.
